Django template

bandirom

Feb 12, 2023

QUICK START

django-template is a project template based on and with . Everything what you will need for develop included here.

5 minutes and you will be ready for develop new projects!

Features:

1. Based on Python 3.9 (will be updated to 3.10 soon)

2. Docker-compose environment

3. integration

4. and integrations

5. Nginx and support SSL (TLS) certificates for https connections (Support http2 protocol)

6. CI/CD integrations for Github and Gitlab repositories.

7. Swagger "out-of-box" for OpenApi

And a lot of another features wait for you!

QUICK START!

This guide helps to install and run new projects.

1.1 Requirements

- Docker with docker-compose

1.2 Usage

Clone the repository

```
$ git clone https://github.com/bandirom/django-template.git ./project_name
```

Before start let's set up superuser email and password (not username)

Open the project in your favorite IDE and edit **docker/prod/env/.data.env** file.

Set up variables for superuser:

```
SUPERUSER_EMAIL=example@email.com
SUPERUSER_PASSWORD=secretpassword
PROJECT_TITLE=MyProject
```

Run the local project with command:

```
$ docker-compose up -d --build
```

Note: You can run project without **-d (detach)** flag, if you don't need to run server everytime

Note: Project will bind 8000 port on your machine. If you wanna change it, you can do it in **docker-compose.yml** in service **web**

Let's check the logs of containers (Only if you use (-d) flag):

```
$ docker-compose logs -f
```

And visit http://localhost:8000.

TWO

CHANGELOG

2.1 1.0.0

- docker and docker-compose support.

MAILHOG
